

This extraordinarily beautiful stretch of Italy offers a breathtaking views to the Sabine hills and the plain of Rome with the unchanged landscape reminiscent of the painters of the 19th century.

The view is panoramic, not overlooked. You can indeed get the spectacular views of a multi-coloured scenery which looks 50km away. Its exposure to West provides a clear and vivid view of the Sunset.

When the swallows are flitting around and the buzzard performs a ritual aerial spectacular display the magic is complete: the view of the sunset is simply stunning.
